The remaining 50%, by Telegraphic Transfer, is required one week before shipment of the complete item. 3. 100% of the cost of items of up to \$40,000.00 is required at the time of order. 4. Bank details for payment, and extended terms, where applicable, will be included in the Proforma Invoice, following the confirmation of your order. 				

Product Description

Start of HRODC AP6 - Mobile Asphalt Mixing Plant - 08 TPH Descriptions

Unit 1: Main Unit = Price: US\$65,000.00

Control System – Unit 2

Technical Specification

- Rated productivity: 8tph
- Suitable material: bitumen, aggregate
- Feeder hopper capacity: 400kg
- Main power: oil burner 23kW, coal burner 39kW
- Product temperature: 120~165°C, adjustable
- Burner: oil, or coal and oil
- Control system: PLC, auto/manual, electronic cabinet and control panel, touch screen

Installed Dimensions & Weight of HRODC_AP6 - 8 Tons Per Hour Mobile Asphalt Plant:

Length: 6.2 meters
Width: 3.5 meters
Height: 6.3 meters
Weight: 5,000-6,000 Kg

Optional Cost

Assembly and Training: US\$20,000.00

Optional Parts					
1.	Aggregate Dosage		* It consists of three bins.	1	\$23,000.00
2.	Finished Elevator System		* It accommodates up 5 tons.	1	\$11,200
3.	Bitumen/ Asphalt Tank		* 10cm ³ * 30cm ³	1	\$19,300.00 \$25,500.00

Asphalt Plant Options and Their Functions	
General Information	The main machine functions as a complete unit, without any real need for additional components. The options are designed to improve the production quality and efficiency of the main plant in different ways, as described below.
Option	Function
Aggregate Dosage	This device filters the asphalt chip/ concrete mix in different grades. This device, therefore, improves the quality of the asphalt chip/ concrete mix. The different grades of mixture will be selected according to the soil or ground grade - for example surface, middle, bottom.
Coal-milling	This device makes the milled aggregate smaller. It mainly used in the Russian environment.
Asphalt Tank	This device keeps the mixture warm and is used to warm it, when cold. It stores the finished product - in addition to the drum, which has a limited capacity (approximately 100 kg mixture). The main machine is, therefore, freed up to continue produce the mixture, with finished product being stored separately in the asphalt tank.
Washery (Water Filter) or Air Bag Filter	This device is mainly for environmental purpose. It is used to diffuse dust from the air, reducing the amount of pollutant released in the air.
Finished Elevator System	The Finished Elevator System helps to maintain the temperature of the mixture, before it is delivered to the truck or other transporter.

OPTIONAL Components - Aggregate Dosage

Price: \$23,000.00
Main Description

Description	Unit
Three-bin System	1set

OPTIONAL Component – Finished Elevator System

Price: \$11,200
Main Description

Description	Unit
5 Ton	1set

OPTIONAL Component – Asphalt Tank

Price for 10cm³: \$19,300.00

Price for 30cm³: \$25,500.00

With Kindest Regards,

Prof. Dr. R. B. Crawford
Chief Executive
