Product Description

Start of HRODC_HAT1 and HRODC_HAT2 Hot Asphalt/ Tarmac Transporter Description

HRODC_HAT1 and HRODC_HAT2 Hot Asphalt – Tarmac Transporter Trucks, for the transport of hot asphalt or tarmac (Bitumen-Aggregate-Sand-Mix) from the asphalt mixing plant to the asphalt project site. For asphalt or tarmac to be effective, it needs to spread at the correct temperature. A loss in temperature will result in unevenness, cracking, non-adhesion to road surface. This situation increases water permeability and subsequent peeling and lifting of the asphalt or tarmac from its under-layers. HRODC_HAT1 and HRODC_HAT2 Hot Asphalt – Tarmac Transporter Trucks are designed to ensure that the asphalt or tarmac maintains its required temperature, even when transported for hundreds of kilometres, from the asphalt/ tarmac mixing plant to the work site. This device, therefore, enhances the quality, aesthetic appeal and durability of your asphalt or tarmac project. Subsequent to this is satisfactory inspection of your asphalt or tarmac projects, putting you in a very good position to win more contracts.
